DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, in particular, is unclear. For example, given the wording and punctuation of the claim, it is unclear whether the “blade pitch control structure...is constructed as an eccentric pin,” or whether the “pin which engages the front end...is constructed as an eccentric pin,” or whether the “bracket provided on the back side of the blade is constructed as an eccentric pin.”

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,893,683 to Horsch et al.

The Horsch '683 patent discloses a blade pitch control structure for a bulldozer. The back side of a bulldozer blade (22) is turnably supported via a universal joint (44) on the front end of a blade lifting frame (30). The universal joint enables attitude control via angling, tilting, and pitch control. The blade pitch control structure further comprises a pin (Fig. 14 -112) which

Art Unit: 3671

engages the front end of a pitch support link (110) with a bracket (140) on the back of the blade.

The pin is constructed as an eccentric pin (see col. 7, lines 31-49).
